cost of food wasted in warm weather through The cost of food wasted in warm weather through lack of proper means to keep it sweet and wholesome often greatly exceeds the cost of a "Gibson." Gibson Refrigerators are scientifically constructed with a series of air vents connecting with the ice chamber. Through these a constant circulation of cold, dry air is maintained, diffecting a great saving in ice consumption and affording the greatest amount of refrigeration.

Special Family Size, equipped with sanitary porclain-lined water cooler, reduced for the coming week. Water does not come in contact with the ice, and is drawn instantly without disturbing the interior through a convenient spigot in front.
